DETAILED ACTION

Continued Prosecution Application

1. The request filed on April 5, 2001, for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/241,127 is acceptable and a CPA has been established. An action on the CPA follows.
2. The Examiner has carefully considered Applicant's amendment and accompanying remarks filed May 11, 2001.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

4. Claims 1-8 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Strack et al. (US 5,681,645), as shown in Paper #6. Rejection is maintained.

Response to Arguments

5. Applicant's arguments filed May 11, 2001, have been fully considered but they are not persuasive for the reasons set forth. Applicant has amended the claims to read "consisting essentially of" in order to substantially close the claim. The use of "consisting essentially of" only excludes components that will affect the basic and novel characteristics of the invention. Applicant argues that the additional layer of material in Strack et al. would impair the elastic characteristics. This argument is not persuasive because even with the additional layer, the laminate of Strack has stretchability. The degree of stretch is limited by the inherent stretch of the

starting textile, i.e. knit or woven or scrim (col 12, ln 61-64). Therefore, the additional layer in Strack et al. has no effect on the flexibility of Strack's laminate.
